ABDELRAHMAN KHALIFA

OBJECTIVE

Highly motivated and dedicated Front-End developer with a passion for creating visually stunning and user- friendly websites. Currently pursuing a degree in the Faculty of Science, with a focus on web development and programming. Fluent in Arabic and English, with experience working with clients from diverse cultural backgrounds.

EXPERIENCE

- **AAK tele-science**
  11/12/2022 - Currently I work there
  Front-End developer
  When it comes to my responsibilities as a Front-End Developer, I was responsible for designing and developing visually appealing and user-friendly websites for clients. This involved collaborating closely with designers and project managers to ensure that the websites met the clients' needs and goals. I was also responsible for testing and debugging the code to ensure optimal performance and functionality.

  In terms of accomplishments, I'm proud of several projects I completed that received positive feedback from clients and end-users. One example is a website I developed for a local business, which increased their online visibility and led to a significant increase in website traffic and sales. I also redesigned a website for a non-profit organization, which improved its user experience and accessibility, resulting in increased engagement and donations.

  Another accomplishment I'm proud of is my ability to work effectively in a team environment. I was able to collaborate with designers and project managers to ensure that projects were completed on time and within budget. My strong communication skills and ability to adapt to different working styles allowed me to build strong relationships with my colleagues and clients.

  Overall, I'm passionate about creating innovative and impactful websites and am always looking for ways to improve my skills and stay up-to-date with the latest technologies and trends in the industry.
